

COMBI SLAB – PETROL FORECOURT

Dramix® 4D Combi Slab was used to construct this forecourt as a liquid tight joint free slab, using one layer of mesh plus Dramix®.

Technical solution

- Fibre Type – DRAMIX® 4D 65/60BG
- Additional Reinforcement – top layer of mesh
- Liquid tight, constructed completely joint free
- C30/37 concrete
- Engineer: Opus
- Contractor: Fulton Hogan

Benefits

- Liquid tight restrained slab constructed joint free
- Reduced long term maintenance
- Improved durability
