

DINDING CHICKEN FACILITY

Lumut, Perak, Malaysia

This project is for the external pavement for the new Dinding facility in Lumut. The pavement is reinforced with Dramix® 3D fibre for heavy traffic load. The slab has a broomed finish to add friction on the road for traffic. This project is still ongoing, Main contractor by ETEC (Korea) consultant by Royal Haskoning and external slab executed by Sathia Construction.

Technical solution

- Dramix 3D fibre
- 250mm HD Pavement
- No mesh

Benefits

Durable heavy duty pavement
Fast to install
Cost effective
