

DRAMIX SFRC FOR TOBACCO INDUSTRIES IN INDONESIA

Two large tobacco facilities utilise Dramix high performing steel fibre reinforced concrete slab solution

Tobacco industry remains high in South East Asia, some producers are opening new production facilities or upgrading their production facility. Due to superior performance against cracking and to minimize slab joints. A Dramix solution was chosen to upgrade two production facilities one at British American Tobacco in Malang, East Java and the other at Japan Tobacco International (JTI) in Malang. Both production facilities in Pasuruan utilise the same high performance Dramix solution.

Technical solution

- Dramix 3D
- K300 Concrete
- Slabs vary between 150 – 200mm
- 20m x 20m Slab Panels with no saw cut

Benefits

Jointless floor
Speed of installation
Large slab panels
Reduced Cost
