

NORTH WEST PROJECTS

North West - Western Australia utilising Dramix Steel Fibre reinforced Concrete

One of the major benefits when using Dramix steel fibre reinforced concrete (DSFRC) is the efficiency in design, efficiency in construction and the cost effective solutions that can be achieved.

The below images are a small sample from various project sin the North West that have utilised Dramix in the concrete.

Technical solution

- Dramix 3D and 5D solutions
- Internal and External pavements
- Construction time savings

Benefits

The benefits of using Dramix in your next project vary similar to the attached projects. Its maybe a more efficient design, it maybe technical aspects that drive to decision.

Time and Cost are significant with most project and BOSFA with a Dramix solution can make sure this happens.
