

# PRECAST WALLS

Rural precast walls for a Dairy Building project in Kamo, New Zealand

Manufactured by Duracrete using their innovative Self Compacting Concrete. [www.duracrete.co.nz](http://www.duracrete.co.nz)

## Technical solution

- Fibre Type: Dramix® 5D 65/60GG
- 30kg/m<sup>3</sup>
- Concrete thickness: 100mm thick section
- 4.4m long
- Concrete quality: C40/50

## Benefits

- Cost efficient
- No minimum cover was required so the panels could be thinner without affecting performance
- Cost and time savings were achieved
- Proven to be more durable and corrosion resistant than traditionally reinforced
