

BOSFA PTY LTD

# CAPABILITY STATEMENT

BOSFA are Australasia's largest supplier of fibres for concrete reinforcement, specialising in providing engineered solutions to consultants, contractors, builders and asset owners. Our inherent strength is vested in the technical expertise of our team and the quality of our products.

We are a 100% owned subsidiary of NV Bekaert® SA of Belgium, the global market and technology leader in steel fibres, producing the range of Dramix® 5D, 4D and 3D steel fibres that are used globally to reinforce over five million cubic meters of concrete every year.

## History.

BOSFA have been in the Australian market for over 15 years, initially specialising in the use of steel fibre reinforced concrete (SFRC) in slab on grade applications, tunnel lining applications and mining. Over the past 5 years BOSFA have diversified and grown to incorporate applications that are challenging the normal for steel fibre reinforced concrete. Applications such as Combi Slab crack width design, and replacement of traditional reinforcement, can now be achieved.

## Continuous Improvement.

BOSFA Pty Ltd are aligned with NV Bekaert's R & D process which is constantly striving for improved performance and the development of new products for the fibre reinforcing market. BOSFA Pty Ltd are also involved in market R & D specific to the Australian market which ensures our clients are receiving the best product for their local applications.

BOSFA Pty Ltd are heavily involved in many R & D projects with Australian Universities in the development of different applications for fibre reinforced concrete, and also involved in the continuing development of the Australian Standards.

NV Bekaert and BOSFA align ourselves with suppliers of the highest quality with stringent supply specifications to ensure continual results from their products.

# EXPERIENCE.

# SOLUTIONS.

## Differentiation.

BOSFA Pty Ltd supply technical solutions utilising fibre reinforced concrete into the construction, civil, and mining markets. To do this our products are of the highest quality. We strive to be technically superior in our approach to the market by employing highly trained staff that have a sound understanding of the construction and mining markets. The staff at BOSFA Pty Ltd are highly trained with tertiary qualifications and further education in regards to specific products and their applications through internal and external training.

## Why Us.

BOSFA pride themselves on being the market leader in product's but also training within the field of SFRC. Our staff are continually challenging the field of reinforced concrete from basic engineering principals to onsite practical knowledge gained over many years.

Our team of Business Development Managers are backed by our in-house Engineering Manager, as well as further technical support as required from Bekaert's world best technical team. Further support is provided by our administration staff who coordinate the daily orders, invoicing and despatch of goods.

## Logistics.

With coverage in every state in Australia and New Zealand, BOSFA has the capabilities to be engaged in multiple projects across multiple states at the same time. With logistical capabilities in most of the major states of Australia ensuring product is always available.
