

5D STEEL FIBRE REINFORCED FOUNDATIONS FOR A MANUFACTURING FACILITY

REMOVED ALL CONVENTIONAL REINFORCING WITHOUT COMPROMISING ON QUALITY OR SAFETY

The poor ground meant that a difficult and complex cage was required to be fabricated for each pad foundation, of a new manufacturing facility. Dramix 5D steel fibre reinforced concrete was a quick, easy and cost effective option that didn't compromise on quality or safety.

Technical solution

- Dramix 5D 65/60BG

Benefits

Dramix 5D fibre only solution for the foundation meant that the hole could simply be dug to size, and then filled with Dramix 5D steel fibre reinforced concrete, saving significant construction cost and time.
