

ANOTHER DRAMIX SLAB-ON-CMC PROJECT AT BRISBANE AIRPORT

McVeigh Consultants understand the true value and unrivalled performance of Dramix 5D 65/60BG steel fibres, making it the perfect product for dealing with the hogging and sagging moments when designing a Slab-on-CMC project. And there are multiple projects at BAC's Export Park at Brisbane Airport, constructed over the last decade, demonstrating why it is the right choice for this application. Hutchies have seen it all before too, so there was no hesitation, having Heidelberg Materials supply the concrete mix for Pourtek Concrete to produce the high-quality finished slabs.

Builder: – Hutchinson Builders
Engineer: – McVeigh Consulting
Premix Supplier: – Heidelberg Materials
Contractor: – Pourtek Concrete

Technical solution

- Dramix Jointless Slab-on-CMCs
