

# CARPARK SLABS

Dramix used in Top down construction

Cockburn Shopping centre upgrade was a top down construction method, fairly new to Perth back in 2013 / 2014 and designed via Airey Taylor Construction. So, it was very pleasing that ATC adopted a fibre solution for the carpark basement slab on this project. It's a great example of SFRC and is easy to access should you like to see how well a Dramix SFRC slab performs.

## Technical solution

- Saw-Cut fibre only slab
- Economical fibre dosage rate
- Dramix 3D

## Benefits

Speed of Construction  
 Ease of construction  
 Reduced labour
