

DRAMIX 4D – HEAVY DUTY COMBI SLAB

Yet another container yard opts for a Dramix Combi Slab solution

11,000m² External Container Pavement (Independent Real Estate Consortium)

Dramix 4D Combi Slab allowed for significant reduction in slab thickness from Conventional Design, including Client requirement for fully-loaded Container Pavement (no BPA reduction factor applied), the removal of Saw Cuts also attractive for long-term maintenance savings.

Technical solution

- Dramix Combi Slab
- Designed for heavy duty container loads
- Designed to engineers required crack width

Benefits

Reduced Slab thickness

No Joints – No Saw Cuts, No Dowelled joints

Long-term maintenance savings
