

DRAMIX COMBI SLAB PROVES IDEAL FOR CONTAINER PAVEMENT REHAB

K&S Freighters at Coopers Plains needed to rehabilitate their heavy-duty container storage pavements but needed to keep the facility operational whilst the construction work was being completed. A Dramix Combi Slab was the ideal solution, allowing them to do smaller areas at a time, whilst still having a Seamless pavement, eliminating any movement joints and saw-cuts. McVeigh didn't hesitate in specifying this solution, having a proven track record, and the unforeseen delays in the project have been easily accommodated by Vaughan's, Concrete Partners, and Holcim.

Client: – K&S Freighters
Builder: – Vaughan Constructions
Engineer: – McVeigh
Premix Supplier: – Holcim
Contractor: – Concrete Partners
Solution: – Dramix Combi Slab
