

## DRAMIX, GREAT FOR WAREHOUSE UNITS TOO

They don't all have to be huge warehouses, Dramix steel fibres can be the perfect solution for smaller warehouse units as well. When Farr Engineers (now Tonkin Engineering) were tasked with designing the slabs in a new warehouse unit development in Geebung, they looked at Dramix for a great, easy to construct, solution. Whilst each individual unit is much smaller than the large warehouses steel fibres are more commonly used in, the multiple number of units still sees an overall size well worth the advantages of this type of solution. There are extra things to consider in design, but it can often be that each single unit is constructed in a single pour. Another great application for Dramix steel fibres.

Developer: FIFE Capital  
 Builder: De Luca Corporation  
 Engineer: Tonkin Engineering  
 (Formally:) (Farr Engineers)  
 Premix Supplier: Neilsens Concrete  
 Contractor: TMD Contractors
