

FOX ROAD AT ACACIA RIDGE

The latest stage of the Fox Road industrial development at Acacia Ridge for ESR includes this very large 47,000m² warehouse, incorporating cold rooms as well, making the construction scheduling a little more difficult than usual for high-quality concrete finishes. But that's exactly what they are getting from Team McGinn, slabs of the highest possible quality. The tried and tested team of McGinn Concrete, working with Neilsens for supply, placing Dramix steel fibre reinforced slabs, is nothing new for Douglas Constructions, and was an easy selection for their latest project.

Client: – ESR Australia
Builder: – Douglas C&E
Engineer: – Tungsten Structures
Premix Supplier: – Neilsens Concrete
Concrete Contractor: – McGinn Concrete

Technical solution

- Dramix Jointless Slabs
