

HEAVILY LOADED ROUNDABOUTS

Combined Solution for Better Performance

The addition of Dramix steel fibres offered additional crack control for heavily trafficked roundabouts at the Perth International Airport precinct.

These roundabouts have been in service now for 9 years, take a look next time you're heading off on an overseas trip.

Technical solution

- Combi Solution
- Dramix + Conventional Reinforcement
- No Joints

Benefits

Reduced long term maintenance.
Improved durability under service loads.
Continually reinforced pavements.
