

STEEL & TUBE HIGHBROOK MANUFACTURING FACILITY

Designed for heavy machinery and racking loads – fully restrained with drainage, pits and plinths.

Technical solution

- Fibre type: Dramix® 4D 65/60BG
- 1 layer of mesh
- C35/45 concrete

Benefits

- NO sawcuts or movement joints required.
- The Combi Slab option was easier to build and more cost effective. The traditional option would have been 2 layers of bars.
