

NEW CONCRETE PLANT, BERKLEY VALE, CENTRAL COAST FOR EASYMIX CONCRETE

Concrete plant covering 2000m². Spoon drains all over the yard to facility water management.

Detailing for joints became a major headache.

Areas where spoon drain affected the material hoppers and front end loader operation slab design changed to 4D Combislab unrestrained

Technical solution

- DRAMIX Combi Slab
- Dramix 4D 65/60 + light mesh
- Reduced Joints
- Reduced Maintenance
- Environmental Control

Benefits

Removal of all control joints meant that there was no issue with regard to water penetration and increased slab integrity.
