

## PRECAST SUMPS

Replacement sumps were required after a couple of years due to the corrosive environment which resulted in the reinforcing steel corroding and causing spalling.

The “inlet” and “outlet” holes had to be cut/drilled onsite.

Manufactured by Duracrete using their innovative Self Compacting Concrete. [www.duracrete.co.nz](http://www.duracrete.co.nz)

### Technical solution

- Fibre Type: Dramix® 5D 65/60GG
- 30kg/m<sup>3</sup>
- Concrete thickness: 150mm thick section
- Concrete quality: C40/50

### Benefits

- The “Inlet” and “Outlet” holes could be cut onsite without the concern of exposing the reinforcing
- Proven to be more durable and corrosion resistant than traditionally reinforced sumps
- No minimum cover was required
- Cost and time savings were achieved
