

ROAD PAVEMENT IN GRIYA IDOLA INDUSTRIAL PARK, TANGERANG INDONESIA

Dramix offers superior performance and cost savings for road pavement in Indonesia

Griya Idola Industrial Park just launched a new industrial area in Tangerang, west of Jakarta. The pavement is prepared for heavy truck loads and long term usage. Original design is 300mm thick slab with K400 concrete reinforced by 2 layer of wiremesh M8. This was completely replaced with Dramix 3D fibres, first slab was cast in 2014 and still continue until today.

Technical solution

- Dramix 3D Fibres
- Reduced slab thickness
- K400 Concrete

Benefits

Superior slab performance
Faster to install
Overall project cost savings
